

FULLSTACK SOFTWARE ENGINEER

Matic Drobez

matic@maticmatic.io | maticmatic.dev

FACTS

- 10+ years across enterprise systems, backend engineering, simulations, and product development.
- Focused on turning complex ideas into production-ready software.
- Strong background in architecture, backend systems, integrations, and deployment workflows.
- Comfortable across Rust, Java, C++, PL/SQL, PHP, and JavaScript.

EXPERIENCE

HRC d.o.o.

Enterprise systems / Oracle stack

- Worked in a structured enterprise environment focused on Oracle technologies.
- Developed and maintained complex PL/SQL logic and database-driven systems.
- Ensured high reliability and precision in systems handling critical data.
- Contributed to system architecture and long-term maintainability.

Result d.o.o.

Backend systems / international enterprise delivery

- Built and maintained enterprise backend systems for international clients.
- Collaborated with global partners such as Sixt and Allane Mobility Group.
- Developed solutions using Java, PHP, PL/SQL, COBOL, and JavaScript.
- Worked on system integrations and large-scale data processing.

SymphonyEYC

Backend engineering / system integration

- Developed backend solutions using Java and Pro*C/C++.
- Worked on enterprise systems and data processing pipelines.
- Gained experience in large-scale system architecture and integration.

Zootfly

Game development / real-time systems

- Worked on game development and AI scripting in C++.
- Contributed to simulation and gameplay logic.
- Built experience with performance-oriented and real-time systems.

STACK

Rust | Java | C++ | PL/SQL | PHP | JavaScript | Microservices | CI/CD | Containers | System design
